la cuarta revolución industrial que arranca de los mimbres de la tercera asociada a la intensa transformación digital iniciada a mediados del siglo pasado presenta un notable poder disruptivo y se desarrolla por vías muy distintas a otros procesos anteriores de transformación económica y social a lo largo de la historia de la humanidad existe un amplio acuerdo en que la cuarta revolución industrial no es una continuidad de la tercera o anteriores sino que supone el nacimiento de una nueva y distinta etapa para la humanidad

el emprendimiento en su complejidad y riqueza ha emergido como uno de los motores más importantes de la innovación el crecimiento económico y la transformación social en el mundo contemporáneo su estudio que abarca un vasto espectro de disciplinas y enfoques es esencial para comprender cómo los emprendedores crean valor generan empleo y contribuyen a la resolución de problemas sociales y económicos sin embargo el proceso emprendedor no se puede reducir únicamente a la creación de una empresa sino que involucra una serie de dinámicas que incluyen la identificación de oportunidades la gestión de recursos la toma de decisiones la capacidad de adaptación y sobre todo la creación de nuevos modelos de negocio que rompen con las estructuras tradicionales en este contexto el presente libro el camino del emprendedor teoría persona y ecosistema de innovación se propone ofrecer un análisis integral y multidimensional de los factores que configuran el emprendimiento en el siglo xxi la obra se organiza en tres partes interrelacionadas que abordan por un lado los fundamentos teóricos esenciales que sustentan la actividad

emprendedora por otro los elementos personales y contextuales que afectan directamente el proceso emprendedor y finalmente los ecosistemas de innovación que facilitan o limitan la emergencia y el éxito de los emprendedores

this book highlights key challenges for developing countries across different regions and sectors and how effectively and with what sorts of policies different countries have responded to them

with very few exceptions industrial development has been central to the process of structural transformation which characterises economic development industrial development for the 21st century examines the new challenges and opportunities arising from globalization technological change and new international trade rules the first part focuses on key sectors with potential for developing countries focussing on two key themes first traditional points of entry for late industrializers like textiles and clothing have become even more intensely competitive than ever before requiring more innovative adaptive strategies for success second countries now recognize that manufacturing does not exhaust the opportunities for producing high value added goods and services for international markets knowledge intensity is increasing across all spheres of economic activity including agriculture and services which can offer promising development paths for some developing countries the final section addresses social and environmental aspects of industrial development labour intensive but not necessarily other patterns of industrial development can be highly effective in poverty reduction though further industrial progress may be less labour intensive a range of policies can promote industrial energy and materials efficiency often with positive impacts on firms financial performance as well as the environment promoting materials recycling and reuse is an effective if indirect means of conserving resources finally the growth of multinational interest in corporate social responsibility is traced with consideration given to both the barriers and opportunities this can pose for developing country enterprises linked to global supply chains

it is almost impossible to imagine life today without the electronics communications and networks we have all come to take for granted the 6g network is currently under development and some chips able to operate at the terahertz thz scale have already been introduced so the next decade will probably see the consolidation of 6g based technology as well as many compliant devices this book presents the proceedings of the 11th

international conference on electronics communications and networks cecnet 2021 initially planned to be held from 18 21 november 2021 in beijing china but ultimately held as an online event due to ongoing covid 19 restrictions the cecnet series is now an established annual event attracting participants in the interrelated fields of electronics computers communications and wireless communications engineering and technology from around the world careful review by program committee members who took into consideration the breadth and depth of those research topics that fall within the scope of cecnet resulted in the selection of the 88 papers presented here from the 325 submissions received this represents an acceptance rate of around 27 providing an overview of current research and developments in these rapidly evolving fields the book will be of interest to all those working with digital communications networks

the 2004 edition of the social panorama of latin america analyses the major demographic changes that have occurred in the region over the past few decades examines the socioeconomic status of latin american youth looks at institutional and programmatic guidelines for youth policies and describes how household structures and family roles have changed as in past years recent trends in poverty and income distribution in the latin american countries are also reviewed

this work aims to provide some useful elements for addressing specific issues related to coordinating policies among sovereign nations in a world undergoing globalization and subject to increasing uncertainty it has a twofold objective to provide clear positions regarding options for latin american integration and to publicize the redima experiment as well as the momentum behind it and the proposals issued through it redima is the acronym of the spanish and portuguese name of the macroeconomic dialogue network implemented in latin america by eclac in cooperation with the european commission publisher s description

this annual publication examines the economic performance of the latin american and caribbean region as a whole and of individual countries for the year 2005 as well as assessing the outlook for 2006 the regional economy grew for a third consecutive year in 2005 with an estimated gdp growth of 4.3 per cent with a projected gdp growth rate in 2006 of 4.1 per cent per capita gdp is estimated to have risen by about 3 per cent the unemployment rate fell from 10.3 per cent in 2004 to 9.3 per cent in 2005 and poverty

indices showed a decrease but the region is growing at lower rates than developing countries as a whole 5 7 per cent gdp growth in the period 2003 2006 latin american and caribbean sub regions show distinctive behaviours the southern cone argentina chile uruguay and the andean community countries and to a certain extent the caribbean registered higher growth than mexico and central america
